

RC LINE

A range of robots combining
confort of use & efficiency

Excellence
inside!

The range is comprised of 3 models:

- **BWT RC30 robotic pool cleaner** - A concentrate of technology for cleans the pool floor, walls and water line.
- **BWT RC40 robotic pool cleaner** - cleans the pool floor, walls and water line.
- **BWT RC60 robotic pool cleaner** - cleans the pool floor, walls and water line.

The **RC40 & RC60** robotic pool cleaner can be easily piloted using any type of SmartPhone using the BWT Best Water Home app available for download from the AppleStore or PlayStore.

RC30 & RC40

**Responsive and intuitive**

RC 30 and 40 are intuitive and easy to use. An indicator light warns you when the filter is full and needs emptying. At the touch of a button, the filter is released and can be removed from above and cleaned without getting your hands dirty.

RC 40 is equipped with a Bluetooth module that allows you to control your robot remotely, select and programme cleaning cycles and receive live notifications.

Compact, elegant design

Although RC 30 & 40 are compact, their ultra-modern design means they clean faster and more efficiently, while consuming less energy.

**Featherweight!**

RC 30 & 40 weigh half as much as most conventional robots. Its quick-drain system makes it particularly easy to take out of the pool.

Filtration

RC 30 & 40 are fitted with a fine filter to trap dust and particles, leaving the water crystal clear.

Thank you RC 30 & 40!

**Effective on all types of surface**

Bottom, sides, waterline... thanks to their on-board technology, RC 30 & 40 can grip even the steepest slopes, whatever the surface. RC 30 & 40 navigate with ease and adapts to all configurations.

Its optimised cleaning path ensures total coverage, whatever the shape of the pool.

Planetary gear system

RC 30 & 40 robots are equipped with two-stage planetary gear technology, a drive system that offers greater efficiency and greater precision. Combined with two drive motors, a powerful pump, a gyroscope system and a number of sensors, RC 30 & 40 are amongst the most reliable robotic pool cleaners on the market.

This system is the ideal solution for fast, optimised movement, unrivalled cleaning and unparalleled reliability.

**Energy efficiency**

With their fast, ergonomic movement and powerful suction, RC 30 and 40 robots are extremely fast. Cleaning cycles are shorter, consume less energy and give impeccable results.

Impeccable cleaning

This robot has it all: one of the best filtration performances on the market, unbeatable suction power, exceptional agility on all surfaces, built-in intelligence, unfailing strength and rock-solid reliability. It is the first choice of professionals and demanding pool owners.

Compact, hydrodynamic and energy-efficient

With its compact design, RC 60 fits easily into tight spaces and bypasses objects that have fallen to the bottom of the pool. Its hydrodynamic design reduces resistance, in turn reducing the power needed to move through the water.

Real energy savings

Optimised cleaning

This robot is equipped with 4 specially formulated PVA brushes, making it suitable for all pool surfaces. Together with the additional vibrating PVC brush, they ensure impeccable cleaning of your pool.

Fast, intelligent cleaning

The RC 60 App robot moves around easily and cleans quickly. It features an intelligent navigation system and two-way suction to keep your robot cleaning throughout its cycle. Comprising a gyroscope and an algorithm, the navigation system scans and detects obstacles, then calculates the cleaning trajectory. The cleaning cycle is shorter and the entire surface to be cleaned is covered. The bottom of the pool, the sides and the water line are cleaned perfectly in as few passes as possible and in record time.

Ease of use & efficiency

RC 60 has been designed with your comfort in mind. Its transport trolley will enable you to store it and position its control box. The swivel will stop cables from getting tangled and the full filter indicator lets you know when the large-capacity filters need cleaning.

The app gives you complete control over your robot, with specific functions such as localised cleaning, turbo mode and even control of your robot's LEDs.

Compatible with all swimming pools

RC 60 is compatible with pools of all shapes and surfaces. RC 60 automatically detects when it is out of the water and returns to the pool when used on zero-entry pools; if the robot leaves the water, it automatically detects this and returns to the pool.

Cleans every zone and space

Bottom of the pool, sides and waterline: RC 60 cleans every surface in your pool.

Connected

RC 60 is equipped with a Bluetooth module. With the BWT Home app, which can be downloaded free of charge from the Apple Store or Playstore, control is at your fingertips! Start and stop your RC 60 remotely, and navigate freely to target problem areas.

RC60

BWT RC30 ROBOTIC POOL CLEANER PRO EXCLUSIVE

Family

- Cleans floor, wall and waterline
- Light weight (less than 6 kg)
- Smart Navigation
- Fine filtration
- Full filter indicator

CLEANING CYCLES 1.5, 2 HOURS

FLOATING CABLE 16 M 52 ft

FINE FILTRATION

FULL FILTER INDICATOR

LIGHT WEIGHT

WARRANTY 2 YEARS

Code	Description	Quantity per pallet
125626742	BWT RC30 robotic pool cleaner	24

BWT RC40 ROBOTIC POOL CLEANER PRO EXCLUSIVE

Family

- Cleans floor, wall and waterline
- Light weight (less than 6 kg)
- Smart Navigation
- Fine filtration
- Full filter indicator
- BWT mobile APP
- Compatible with floating battery

CLEANING CYCLES 1.5, 2-2.5 HOURS

FLOATING CABLE 16 M 52 ft

FINE FILTRATION

FULL FILTER INDICATOR

BWT MOBILE APP

LIGHT WEIGHT

COMPATIBLE FLOATING BATTERY

WARRANTY 2 YEARS 1 LIMITED YEAR

BWT RC60 ROBOTIC POOL CLEANER PRO EXCLUSIVE

Family

- Cleans floor, wall and waterline
- Smart Navigation
- Hyperfine filtration
- Full filter indicator
- Anti-tangle swivel
- BWT mobile APP
- Led blue
- Caddy

CLEANING CYCLES 1.5, 2, 2.5 HOURS

FLOATING CABLE 18 M 59 ft
